

Advanced Equipment

There comes a time when a young golfer is no longer a beginner and needs something better. TOUR SERIES is our answer.

Since being introduced in 2007, TOUR SERIES has already become the number one choice of competitive players age 12 and under at the World Championship. Why, you might ask? Performance. The ball goes farther and the young player's swing develops faster.

What makes TOUR SERIES special and unique is that each size is designed and manufactured to provide a perfect fit. We accomplish this by customizing every aspect of each club including length, driver loft and volume, club head weight, shaft weight, frequency, flex with a low kick point, grip size and lie angle.

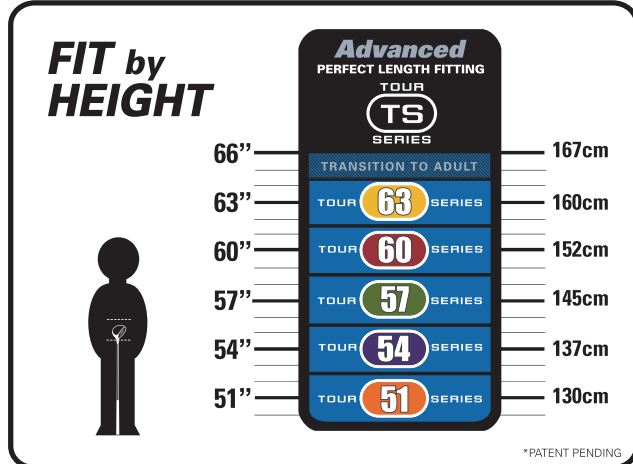

TOUR SERIES equipment helps young golfers play their best...that's why the best players, play TOUR SERIES.

Dan Van Horn
President, US Kids Golf

How tall are you?

If you know the player's height, finding the right size is easy.

 **U.S. Kids Golf FITTING CHART™**

Beta Forged Titanium Driver

Proportionately sized head, classic pear shaped with maximum allowable CT (Characteristic Time) for an extra 15 yards off the tee

597 Alignment Putter

Extreme perimeter weighting for higher MOI and improved results on off-centered hits

431 Stainless Irons

Soft feel with a traditional shape and minimal offset

17-4 Stainless Fairway Woods and Hybrid

Low center of gravity creates a club that easily gets the ball airborne

Black Nickel 8620 Spin Wedges

Milled face and grooves to produce extra spin around the greens

Shaft

Frequency matched and spined shafts for a consistent feel from driver to wedge. The low kick point offers an optimal ball flight.
